Sample Directions for Use of a Medication Log

1. The medication log is used to document that medication has been given to a child. Because this log is a legal document you must initial and sign each entry in ink.
2. Each medication given in the child care facility will need to have the following information written on the log:
 - Child's Name
 - Child Care Facility
 - Medication Name
 - Dosage—this must be the same as on the bottle and authorization form
 - Time the medication is to be given and time span for medication (e.g., days, weeks, months)
 - For Prescription medication--Name of person with Prescriptive Authority
 - Picture of the child if child is five years of age or younger
3. Have the log with you when you are giving any medication. Remember to check the information and compare it with the medication label before you give the medication to the child. Check to see if the medication has already been given to the child for that day and at that time by any other person.
4. It is preferable to assign one person to give all medications to the child for the day to avoid double dosing or missing a dose. Identify the child by name before giving the medication to the child and/or check the attached picture of the child.
5. Immediately after giving the medication, document:
 - Name and dosage of medication
 - Time the medication was given
 - Day and date the medication was given
 - Initials of the person administering the medication
6. If the medication is dropped on the floor, the child refuses to take the medication, spits out the medication, or any other unusual occurrence happens, make note (or designate NG for not given) in the Comment area and contact the parent.
7. If the child is absent from the facility, not in the Comment area an "A" for absent.
8. When the log is discontinued, write the date of discontinuation and arrange for the parent to pick up medication container, or dispose of any left over medication.
